

Lijst met meest gebruikte botanische namen in CLIENT Export (versie 19 december 2017)

| Vertaling                 | Botanische naam                                                        |
|---------------------------|------------------------------------------------------------------------|
| Aalbes                    | <i>Ribes rubrum</i>                                                    |
| Aardappel                 | <i>Solanum tuberosum</i>                                               |
| Aardbei                   | <i>Fragaria vesca</i>                                                  |
| Abrikoos                  | <i>Prunus armeniaca</i>                                                |
| Adzuki                    | <i>Vigna angularis</i> var. <i>angularis</i>                           |
| Akurataki                 | <i>Pleurotus ferulaceus</i>                                            |
| Alfalfa                   | <i>Medicago sativa</i>                                                 |
| Ananas                    | <i>Ananas comosus</i>                                                  |
| Andoorn-wortel            | <i>Stachys affinis</i>                                                 |
| Andoorn-wortel            | <i>Stachys sieboldii</i>                                               |
| Appel                     | <i>Malus domestica</i>                                                 |
| Artisjok                  | <i>Cynara scolymus</i>                                                 |
| Asperge                   | <i>Asparagus officinalis</i>                                           |
| Aubergine                 | <i>Solanum melongena</i>                                               |
| Avocado                   | <i>Persea americana</i>                                                |
| Avocado                   | <i>Persea gratissima</i>                                               |
| Babaco (wilde papaya)     | <i>Carica pentagona</i>                                                |
| Bamboe                    | <i>Bambusa</i> sp.                                                     |
| Banaan                    | <i>Musa</i> sp.                                                        |
| Basilicum                 | <i>Ocimum basilicum</i>                                                |
| Bergamotcitroenen         | <i>Citrus bergamia</i>                                                 |
| Beukenzwam/Beech mushroom | <i>Hypsizygus tessulatus</i>                                           |
| Bladpeterselie            | <i>Petroselinum crispum</i> var. <i>crispum</i>                        |
| Blauwe bosbes             | <i>Vaccinium myrtillus</i>                                             |
| Blauwebes                 | <i>Vaccinium corymbosum</i>                                            |
| Bleekselderij             | <i>Apium graveolens</i> var. <i>dulce</i>                              |
| Bloemkool                 | <i>Brassica oleracea</i> convar. <i>botrytis</i> var. <i>botrytis</i>  |
| Boerenkool                | <i>Brassica oleracea</i> convar. <i>acephala</i> var. <i>sabellica</i> |
| Bonen                     | <i>Phaseolus vulgaris</i>                                              |
| Bonenkruid/Savory/kruiden | <i>Satureja hortensis</i>                                              |
| Bos aardbei               | <i>Fragaria x ananassa</i>                                             |
| Braam                     | <i>Rubus fruticosus</i>                                                |
| Broccoli                  | <i>Brassica oleracea</i> convar. <i>botrytis</i> var. <i>cymosa</i>    |
| Bundelzwam                | <i>Pholiota nameko</i>                                                 |
| Cacao fruit               | <i>Theobroma cacao</i>                                                 |
| Calamondin                | <i>Citrus madurensis</i>                                               |
| Cantharel                 | <i>Cantharellus cibarius</i>                                           |
| Capulin                   | <i>Prunus salicifolia</i>                                              |
| Cassave                   | <i>Manihot esculenta</i>                                               |
| Champignon                | <i>Agaricus bisporus</i>                                               |
| Chayotte                  | <i>Sechium edule</i>                                                   |
| Cherimoya                 | <i>Annona cherimola</i>                                                |
| Chervil/kruiden           | <i>Anthriscus cerefolium</i>                                           |
| Chinese artisjok          | <i>Stachys affinis</i>                                                 |
| Chinese artisjok          | <i>Stachys sieboldii</i>                                               |
| Chinese kool              | <i>Brassica cernua</i>                                                 |
| Chinese peer              | <i>Pyrus bretschneideri</i>                                            |
| Chinese spinazie          | <i>Amaranthus dubius</i>                                               |
| Chinotto                  | <i>Citrus myrtifolia</i>                                               |
| Chives                    | <i>Allium schoenoprasum</i>                                            |
| Citranequat               | <i>Citrus</i> sp.-citranequat                                          |
| Citroen                   | <i>Citrus limon</i>                                                    |
| Citroengras               | <i>Cymbopogon citratus</i>                                             |
| Courgette                 | <i>Cucurbita pepo</i>                                                  |
| Cranberry / veenbes       | <i>Vaccinium macrocarpon</i>                                           |
| Crazy pea                 | <i>Pisum sativum</i>                                                   |
| Cress afilla              | <i>Pisum sativum</i>                                                   |
| Cress Wheatgrass          | <i>Agropyron cristatum</i>                                             |

|                                                                  |                                                            |
|------------------------------------------------------------------|------------------------------------------------------------|
| Dadel                                                            | <i>Phoenix dactylifera</i>                                 |
| Dille                                                            | <i>Anethum graveolens</i>                                  |
| Diverse soorten sla ( hier valt ook chineese of wosun sla onder) | <i>Lactuca sativa</i>                                      |
| Djeroek Kastoeri                                                 | <i>Citrus microcarpa</i>                                   |
| Dragon/Tarragon kruiden                                          | <i>Artemisia dracunculus</i>                               |
| Druif                                                            | <i>Vitis vinifera</i>                                      |
| Durian                                                           | <i>Durio zibethinus</i>                                    |
| Eekhoornjesbrood                                                 | <i>Boletus edulis</i>                                      |
| Eikhaas                                                          | <i>Grifola frondosa</i>                                    |
| Enoki                                                            | <i>Flammulina velutipes</i>                                |
| Fejoya                                                           | <i>Feijoa sellowiana</i>                                   |
| Framboos                                                         | <i>Rubus idaeus</i>                                        |
| Frisee                                                           | <i>Cichorium endivia subsp. crispum</i>                    |
| Galanga                                                          | <i>Alpinia sp.</i>                                         |
| Gele Kiwi                                                        | <i>Actinidia chinensis</i>                                 |
| Gele oesterzwam                                                  | <i>Pleurotus citrinopileatus</i>                           |
| Gember                                                           | <i>Zingiber officinale</i>                                 |
| Goud bes, Ananaskers                                             | <i>Physalis peruviana</i>                                  |
| Granaatappel                                                     | <i>Punica granatum</i>                                     |
| Grapefruit                                                       | <i>Citrus x paradisi</i>                                   |
| Grenadillo                                                       | <i>Passiflora edulis</i>                                   |
| Grijze cantharel                                                 | <i>Cantharellus tubaeformis</i>                            |
| Groene Kiwi                                                      | <i>Actinidia deliciosa</i>                                 |
| Guave                                                            | <i>Psidium guajava</i>                                     |
| Hoorn des overvloeds ( Zwarte Trompet)                           | <i>Craterellus cornucopioides</i>                          |
| Ijsbergsla                                                       | <i>Lactuca sativa var. capitata</i>                        |
| Ikako pruim                                                      | <i>Chrysobalanus icaco</i>                                 |
| Japanse aardappel                                                | <i>Stachys affinis</i>                                     |
| Japanse aardappel                                                | <i>Stachys sieboldii</i>                                   |
| Japanse pruimen                                                  | <i>Prunus salicina</i>                                     |
| Japanse sla                                                      | <i>Brassica juncea subsp. juncea</i>                       |
| Japanse wijnbes                                                  | <i>Rubus phoenicolasius</i>                                |
| Judas oor                                                        | <i>Auricularia auricula-judae</i>                          |
