

Overzicht inspectiepercentages voor Kwaliteit bij import van Groenten en Fruit

Voor 87 producten geldt een inspectieplicht bij import. De inspectiepercentages voor Kwaliteit bij import van Groenten en Fruit worden jaarlijks herzien op basis van een risico-analyse conform Artikel 11 van Verordening EU 543/2011. De systematiek die daarbij gehanteerd wordt is vastgesteld door het bestuur van het KCB. Voor bepaalde producten uit bepaalde landen (product-land combinaties) is in risicovolle perioden een verhoogd inspectiepercentage van toepassing en voor een aantal producten met een laag kwaliteitsrisico geldt een verlaagd inspectiepercentage zoals opgenomen in onderstaand overzicht.

NB:

- Wanneer een bepaalde product-land combinatie niet in het overzicht genoemd is, en het betreft product vallende onder de Specifieke Handelsnorm, dan is het inspectiepercentage 100%.
- Wanneer een bepaalde product-land combinatie niet in de tabel genoemd is, en het betreft product vallende onder de Algemene Handelsnorm waarvoor een inspectiepercentage is vastgesteld, dan is het inspectiepercentage 10%.
- Indien een zending uit een erkend 3^e land (Vo. EU 543/2011) voorzien is van een normcontrolecertificaat, gelden lagere inspectiepercentages. Het normcontrolecertificaat dient ter controle toegestuurd te worden aan het KCB.
- Voor RIK-deelnemers geldt bij kwaliteitsinspecties een verlaagd inspectiepercentage van 5%.
- De vermelde percentages gelden voor kwaliteitsinspecties. Indien voor een bepaalde product-land combinatie ook een fyto-sanitair inspectiepercentage van toepassing is, dan is het hoogste inspectiepercentage leidend.
- Rood gemarkeerde vakken geven een stijging van het inspectiepercentage aan ten opzichte van dezelfde maand in het voorgaande jaar.
- Groen gemarkeerde vakken geven een daling van het inspectiepercentage aan ten opzichte van dezelfde maand in het voorgaande jaar.
